- Why Are We Here Today?
- Basics of Conditional Access
- How the Bad Guys Attack
- What's New in 2026 for Conditional Access
- Enjoy!

Why are We Here Today?

It’s pretty simple… We have BAD GUYS, we have YOU.. And we have US!

The Bad Guys

Office 365 Admins

Your Speakers

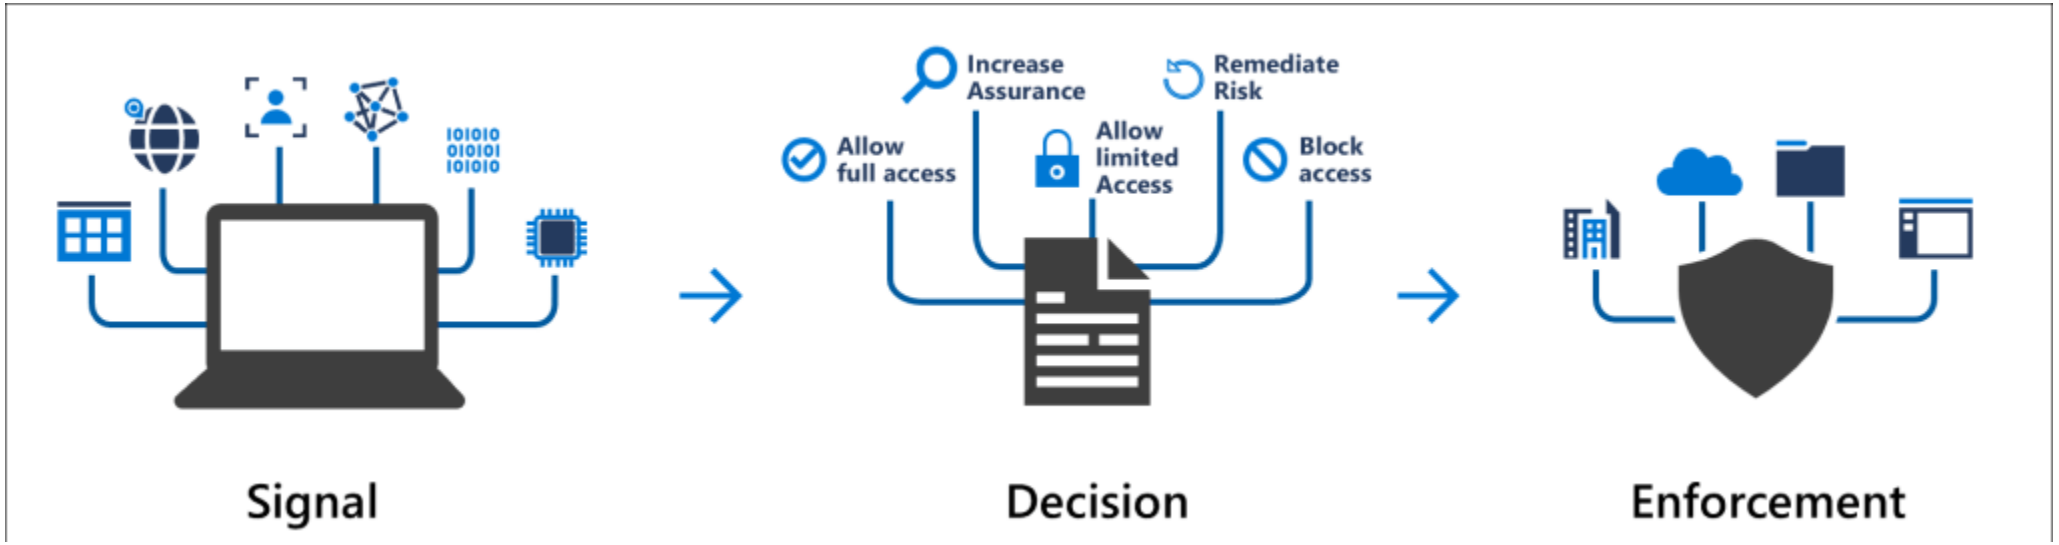
Buckle Up Buttercup, It’s Time to Learn The Basics

3-Headed Dragon of Conditional Access

https://www.wpninjas-germany.com/
#WPNinjasGermany

We have 3 things that comprise conditional access policies.

It’s always good to do a little bit of review:

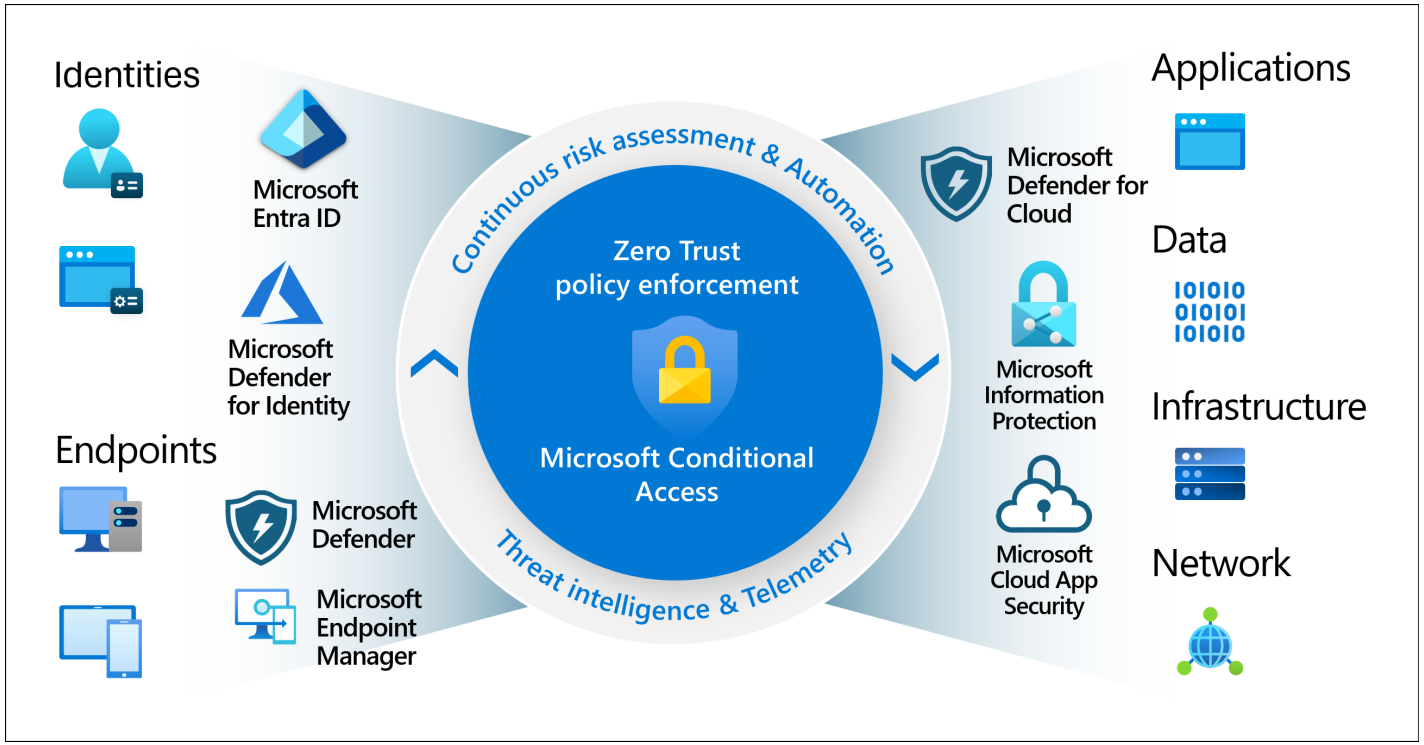


Signals

https://www.wpninjas-germany.com/
#WPNinjasGermany

We can group signals into a few categories.

- Users and Groups
- Devices
- Networks
- Apps
- Defender for Cloud Apps
- Risk Detection

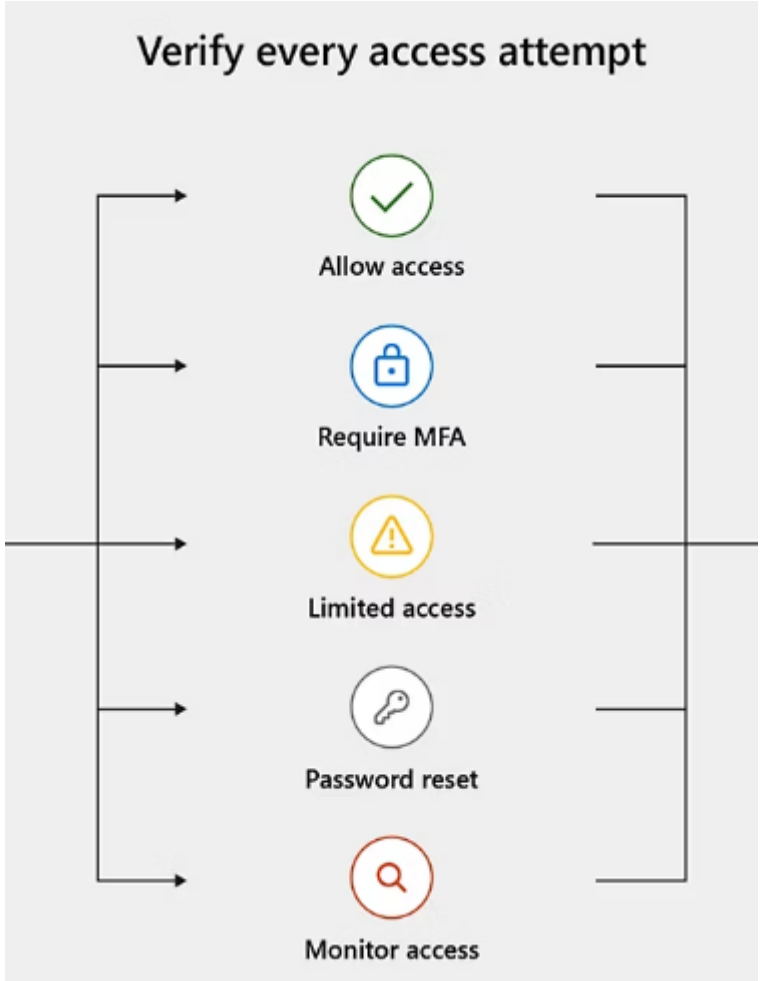


Decisions

Decisions either block access or grant access.

Grant Access have a few fun options:

- Requiring MFA or Auth Strength
- Requiring Compliant Devices
- Requiring Hybrid-Join (Boo!!!!)
- Require App Protection Policy
- Require Password Change
- Custom Controls
- Terms of Use

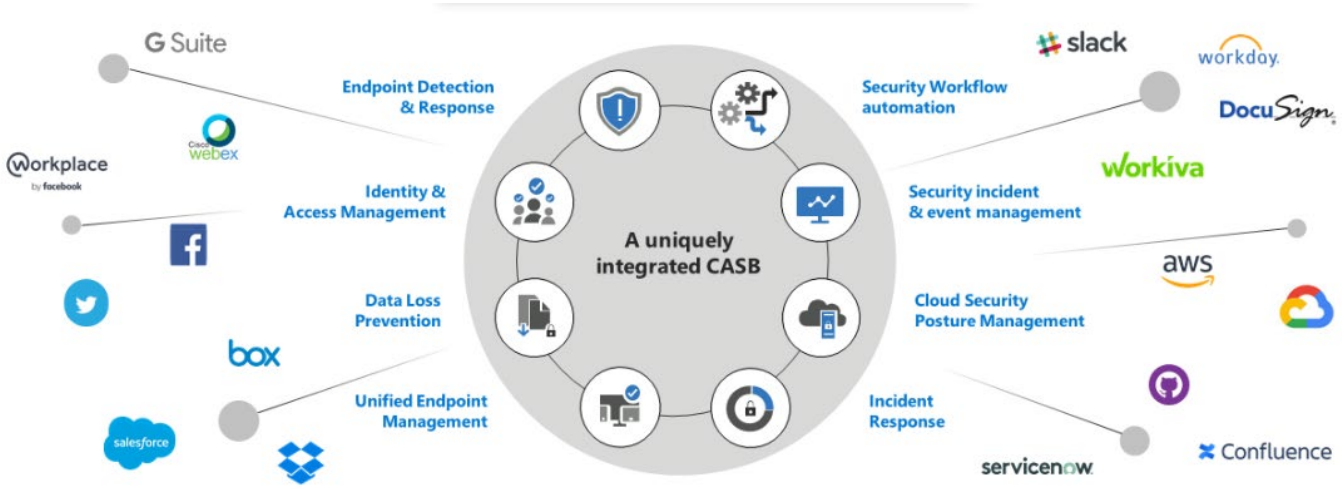


Enforcement

https://www.wpninjas-germany.com/
#WPNinjasGermany

Enforcement will strengthen the security posture through session decisions:

- App-Enforced Restrictions (Conditional Access App Control
- Enforce Sign-In Frequency
- Controlling Persistence
- Disabling Resilience
- Token Protection
- Enforcing Global Secure Access Profiles



Bad Guys and Their Shenanigans

SO MANY ATTACKS IN THE WILD!!!

https://www.wpninjas-germany.com/
#WPNinjasGermany

- We have many different types of attacks people use in the Office 365 world:
  - MFA Fatigue Attacks
  - Downgrade Attacks on User Agents (and Windows Hello)
  - Session Hijacking
  - MITM
  - Device Code Flow Phishing as seen in Storm-2372
  - Brute Forcing Basic Authentication
  - Token Theft and Replay

Conditions

Control access based on signals from conditions like risk, device platform, location, client apps, or device state. Learn more

User risk

User risk level is the likelihood that the user account is compromised.

Not configured

Sign-in risk

Sign-in risk level is the likelihood that the sign-in session is compromised.

Not configured

Insider risk

Insider risk assesses the user's risky data-related activity in Microsoft Purview Insider Risk Management.

2 included

Insider risk

Control access for users who are assigned specific risk levels from Adaptive Protection, a Microsoft Purview Insider Risk Management feature. Insider risk levels are determined based on a user's risky data related activities. Learn more

Configure

Yes | No

Select the risk levels that must be assigned to enforce the policy

- [x] Elevated
- [x] Moderate
- [ ] Minor

The insider risk condition requires configuration in Adaptive Protection. Go to Microsoft Purview

AI Agents

AI Agents

https://www.wpninjas-germany.com/
#WPNinjasGermany

🔬 Currently in Preview

Microsoft Entra Agent ID is a dedicated identity framework introduced at Microsoft Ignite 2025 that treats AI agents as first-class entities — with their own authentication, authorization, lifecycle management, and governance.

Human Identities

Employees, partners, customers — managed since Day 1

Workload Identities

Apps, service principals, managed identities

Agent Identities ✨

AI agents with autonomous actions at enterprise scale

What Agent ID Enables

https://www.wpninjas-germany.com/
#WPNinjasGermany

Authentication & Authorization

- OAuth 2.0 token-based auth to Microsoft services
- Delegated access — act on behalf of users
- Autonomous access with direct permissions
- Agent-to-agent authentication via MCP/A2A protocols

Agent Registry & Discovery

- Centralized inventory of all agents in your tenant
- Auto-discovery across Copilot Studio, Teams, Foundry
- Metadata: capabilities, tasks, protocols, owner
- Agent blueprints define identity templates

Identity Governance

- Lifecycle management from creation to expiration
- Sponsor & owner assignment (prevents orphaned IDs)
- Entitlement management with time-bound access
- Access reviews for privileged agent identities

Identity Protection

- Risk detection: unusual/unauthorized activities
- Risk signals feed into Conditional Access policies
- Automatic remediation of high-risk compromised agents
- Audit logs in Entra admin center
