Agenda

https://www.wpninjas-germany.com/
#WPNinjasGermany

Key takeaways:

- **PSADT what & why**
- **Fully Automate testing & deploying**

Type of Apps

What's available today in Intune?

PSADT?

What is this dark magic ..

PSADT v4.1

What's NEW??

Automation?

Automate the crap out of it

Q&A

????

Application Types

What’s available in Intune Today?

What App Types do we have today?

- **Line of Business Apps**
  - Only supported for MSI(x), APP(x)
  - Doesn’t rely on IME
- **Win32 Apps**
  - All type of installers
  - Wrapped outside of Intune
  - Requires IME
- **Microsoft Apps**
  - Microsoft “policy” apps
  - Straight from CDN
- **Windows Store Apps**
  - Directly integrated
  - Uses IME or WinGet
  - UWP & Win32 App
- **Web Link**

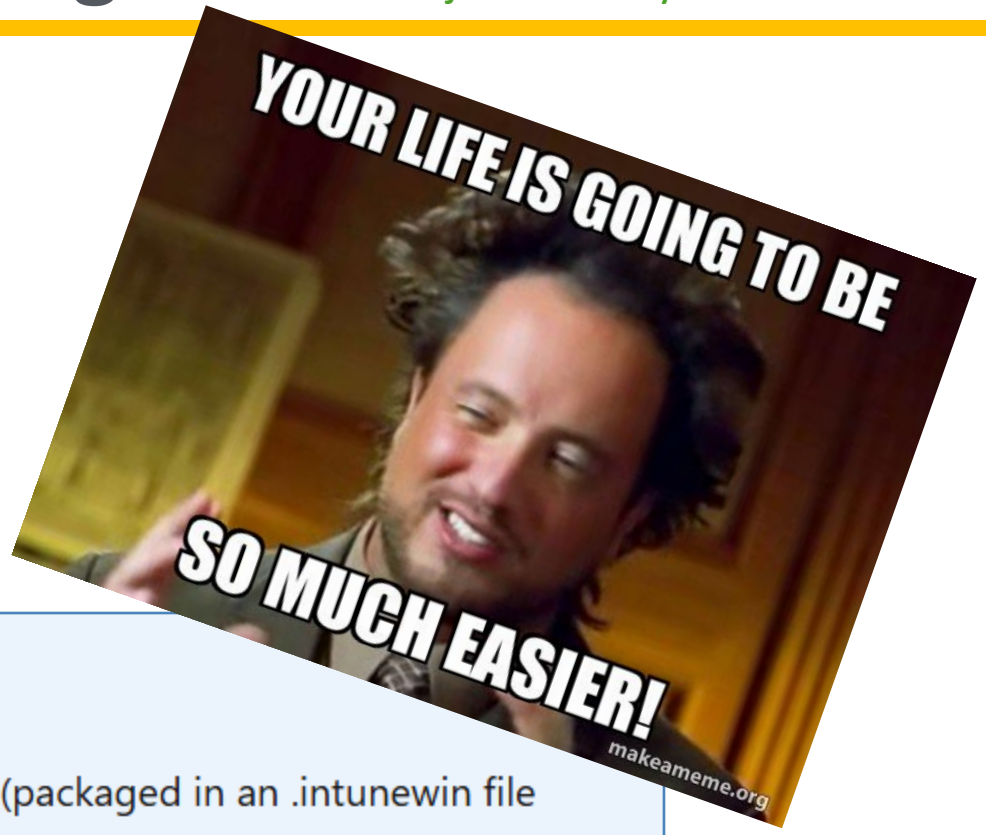
LOB VS Win32

https://www.wpninjas-germany.com/
#WPNinjasGermany

	Line of Business	Win32 App
	• Limited Support • Single Installation file (No support for complex installers) • Limited Customization	• Relies on IME • Requires outside wrapping (.intunewin format) • Requires more skill
	• Convenience (easy to create) • Does not Rely on IME • No Scripting / Packaging required	• Multiple installer types (e.g., EXE) • Support for Complex Installers • Support for Detection methods, Dependencies, supersedence, DO, .. • GOOD LOGGING !!

Autopilot shenanigans

https://www.wpninjas-germany.com/
#WPNinjasGermany



- Make your life easy
  - Don’t mix
  - Or just don’t use LOB apps .. ☺

ⓘ Important

When deploying Win32 apps using an installation file with the .msi extension (packaged in an .intunewin file using the Content Prep Tool), consider using Intune Management Extension. If you mix the installation of Win32 apps and line-of-business apps during Windows Autopilot enrollment, the app installation may fail as they both use the Trusted Installer service at the same time.

Although Windows Autopilot doesn't support mixing of Win32 and line-of-business apps, Windows Autopilot device preparation does.

PSADT

What is this dark magic ..

PSADT Overview

- Open-Source scripting framework
- Follows best practice workflow for installing, removing and repairing applications

- **Key Features:**
  - Pre-built PowerShell functions for common tasks
  - Dynamic logging
  - User interaction support !!
  - Custom branding
  - Cross vendor compatibility

PSADT HOW TO 101

https://www.wpninjas-germany.com/
#WPNinjasGermany

PSADT 4.1

What’s new on the block?

What's new in v4.1

https://www.wpninjas-germany.com/
#WPNinjasGermany

- **Major Improvements**
  - No more ServiceUI Needed !!
  - You can now show user interfaces during SYSTEM context without using ServiceUI
    - Increase in Security & Reliability
    - UI Interactions are handled in user's Session, not in SYSTEM
  - Full feature Parity between "Fluent" & "Classic" user interfaces

- If you're still on v3

OLD NAME	NEW NAME	MORE INFORMATION
