01 What Android Enterprise is in the Microsoft Intune world

02 Managed Google Play

03 Enrollment Types: The Four Pillars

04 Device Compliance & Configuration

05 Things you need to know

06 Key Takeaway

What Android Enterprise is in the Microsoft Intune world

What Android Enterprise is?

https://www.wpninjas-germany.com/
#WPNinjasGermany

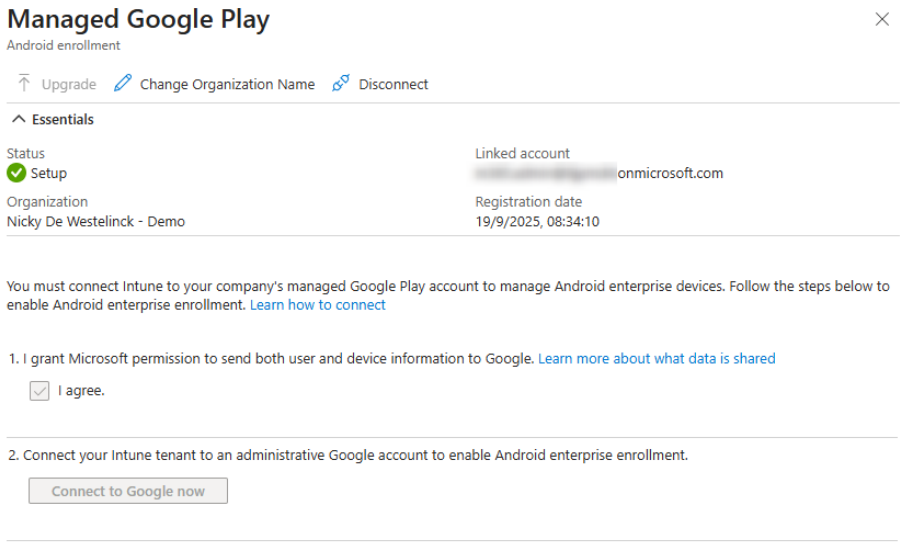
- **Android Enterprise** provides a modern, secure, and consistent management framework across all Android manufacturers.
- It ensures strong **separation between work and personal** data for better privacy and compliance.
- It supports **multiple deployment** modes like BYOD, fully managed, and dedicated devices to fit any scenario.
- **Microsoft Intune** centrally manages device configuration, policies, and apps, making it easy to deploy and maintain secure Android setups at scale.
- **Microsoft Intune** adds deep integration with Microsoft Entra ID.

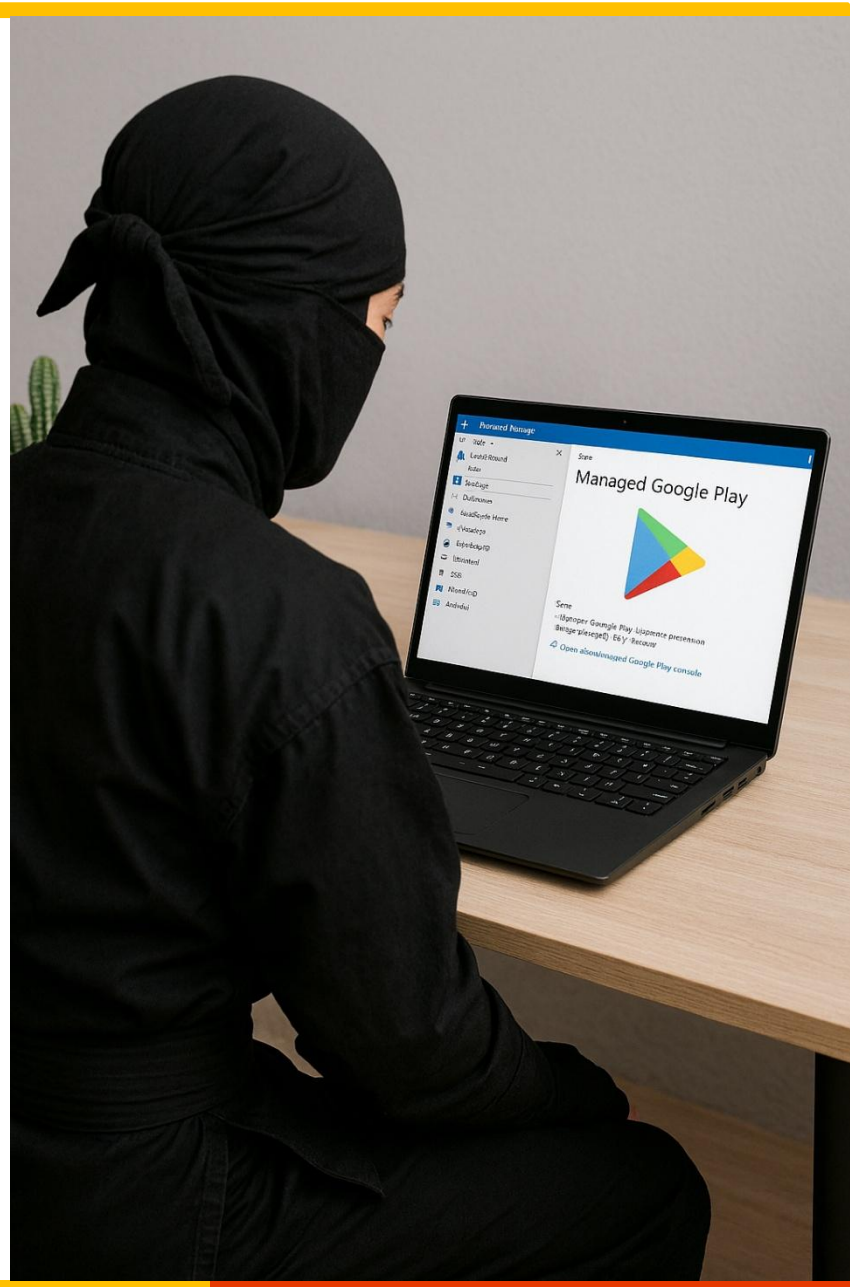
Managed Google Play

Managed Google Play

https://www.wpninjas-germany.com/
#WPNinjasGermany

- **Required** for Android Enterprise Management in Microsoft Intune (use a Entra ID account or upgrade you Gmail account to one)
- **Secure and controlled** app distribution
- **Support** for private (line-of-business) apps
- **Consistent** user **experience** across devices





Enrollment Types: The Four Pillars

Enrollment Types

https://www.wpninjas-germany.com/
#WPNinjasGermany

- **Personally owned devices with work profiles**
- **Corporate-owned dedicated devices**
- **Corporate-owned, fully managed user devices**
- **Coporate-owned devices with work profile**

Enrollment Profiles

Personally owned devices with work profile	Manage personal enrollments with work profiles
Corporate-owned dedicated devices	Manage device owner enrollments for kiosk and task devices
Corporate-owned, fully managed user devices	Manage device owner enrollments for user devices
Corporate-owned devices with work profile	Manage enrollments for corporate devices with work profiles

Use Cases

https://www.wpninjas-germany.com/
#WPNinjasGermany

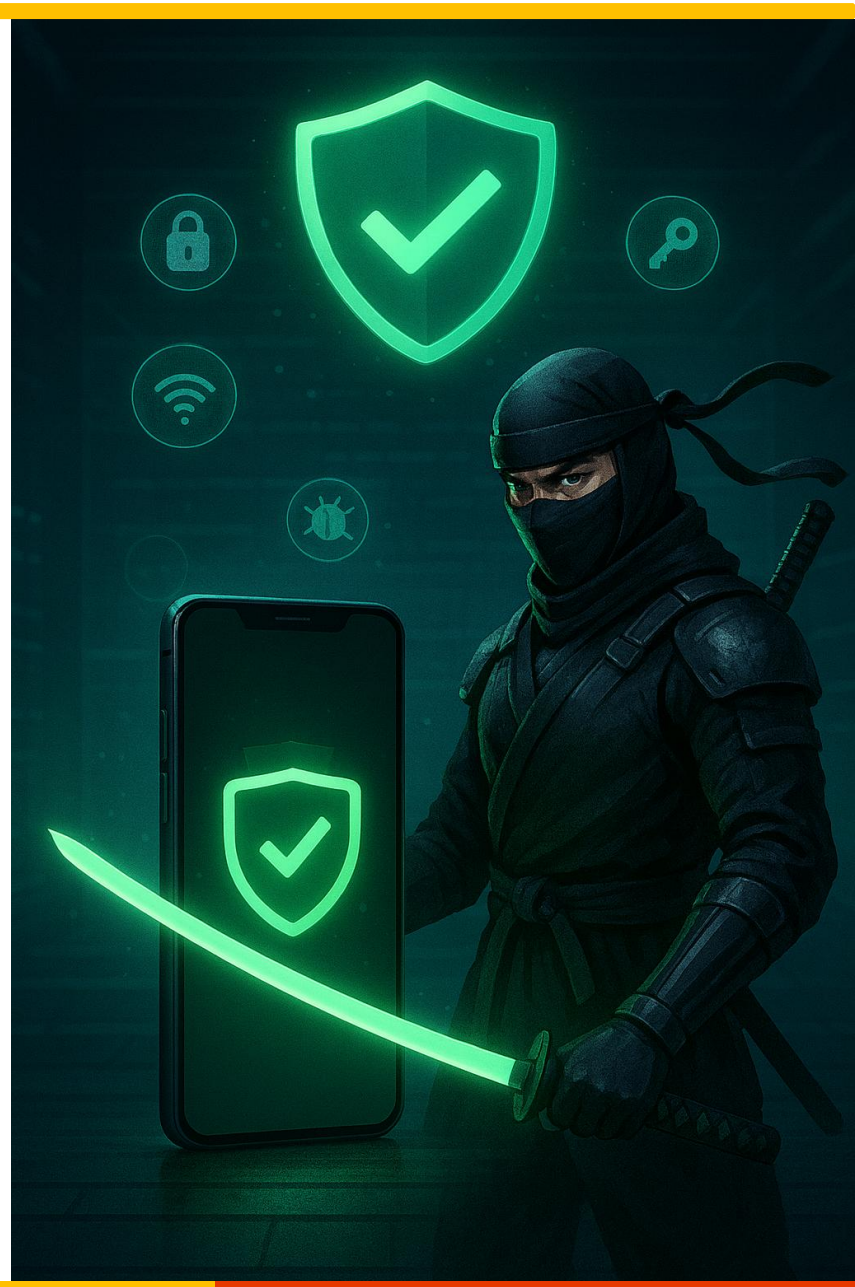
Personally owned devices with work profiles (BYOD)	Corporate-owned dedicated devices	Corporate-owned, fully managed user devices	Coporate-owned devices with work profile
Knowledge workers on personal phones	**Frontline** & **Operational** devices	**Regulated** or high-security roles	**Corporate phones** with personal use
Consultants or **Contractors**	**Shared** shift-based devices	**Standardized** enterprise rollouts	**Controlled** + user-friendly model
Consider Mobile Application Management	**Customer-facing** or **Check-in kiosks**	Organizations that **do not allow** personal devices	**Global organizations** with mixed needs

Device Compliance & Configuration

Device Compliance

https://www.wpninjas-germany.com/
#WPNinjasGermany

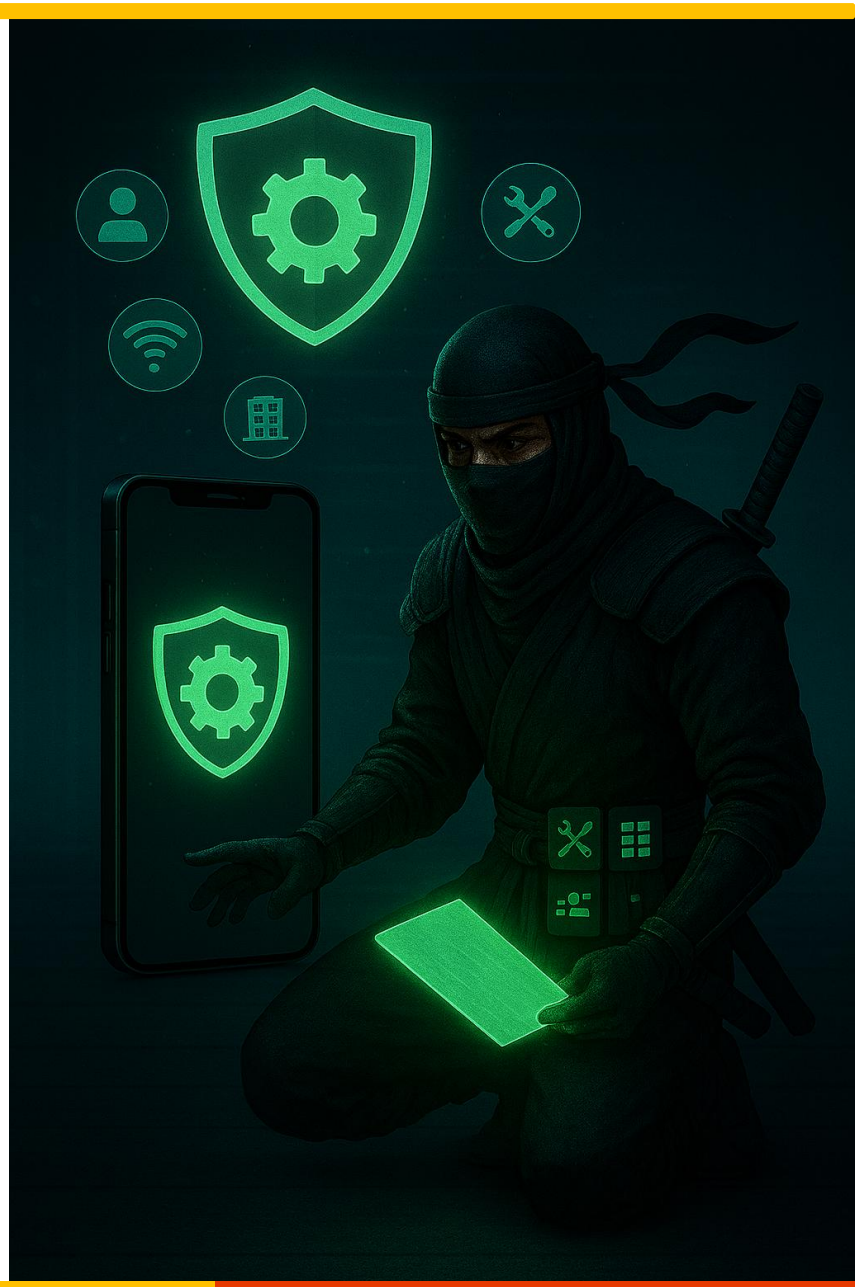
- Guarantees only **secure**, **policy-aligned** Android Enterprise devices access **corporate data** (with use of Conditional Access)
- **Enforces** critical **security baselines** (encryption, pincode, OS Patch level
- **Protects** against compromised or tampered devices (rooted/jailbroken, high-risk endpoints)
- Supports **Conditional Access** for app-based access
- **Provides** clear **visibility** and **automated remediation**



Device Configuration

https://www.wpninjas-germany.com/
#WPNinjasGermany

- **Defines** the device's **behavior** and **capabilities**
- **Delivers** a **consistent**, predictable **experience** across diverse Android Enterprise OEMs
- **Enforces security posture** at the configuration level
- **Enables frontline-ready setups** (Single- or Multi Apps Kiosk, Managed Home Screen, OEMConfig tuning).
- **Reduces manual setup** and **user error**



Things you need to know

Things you need to know

https://www.wpninjas-germany.com/
#WPNinjasGermany

Enrollment Time Grouping

Organizes devices based on when they enroll

Time-based, not dynamic

Reduces admin overhead

Staging

Dedicated, Fully Managed, Work Profile

Not compatible with Enrollment-Time Grouping

No user login required

Ideal for large deployments

Shared Entra Mode

Dedicated devices

Multiple users on one device

Reduces device costs

OEMConfig & Managed Home Screen

OEMConfig delivers OEM specific settings and permissions

Managed Home Screen Controls the interface and end-user experience

Key Takeaways

Key takeaways

So how do you choose the right setup?

Ownership → **Use Case** → **Shared or not?** → **OEMConfig** needed? → **Enrollment Method**

Key Takeaways

- **Android Enterprise gives structure**, once you understand the framework, everything else becomes predicatable

- **Choose enrollment based on ownership + control,** that simple formula guides every decision.

- **Think in patterns, not features** (ownership → use case → shared or not → OEM needs → enrollment method).

Quote

“Android Enterprise becomes easy when you follow the pattern: ownership, use case, and the right enrollment flow.”
